Investor Pitch Deck

July 2025

Seed Funding

metatron

Matching startups with investors - bringing investment online

Lowering the barriers to entry for startups looking for funding

Simplifying deal flow for investors

Financial

This Investor Pitch Deck will set out how the company will achieve the following results with the invested money:

Value	**$1 Million** investment
Type of Funding	Angel Round (SAFE)

1. Metatron requires seed funding to further develop its Web3 ecosystem
2. Metatron requires the funding to unlock its share of $ 285 billion worth of investment in projects globally
3. Raised to date, $180k from Nick Allison and $100k pre-seed from Flori Ventures in Barcelona (Celo.org ecosystem)

The right interventions could unlock up to $ 285 billion to invest in global projects and infrastructure

Global startup investment in 2023 reached $285 billion — marking a 38% decline year over year, down from the $462 billion invested in 2022.

Problem

Challenges in Traditional Venture Capital

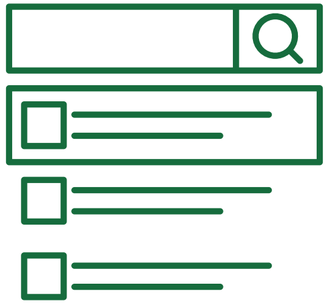
Centralised decision-making and inbound deal flow with limited transparency

High barriers to entry for smaller investors & startups

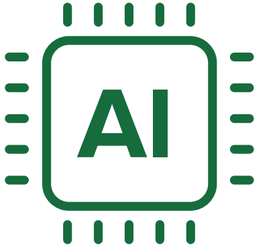
Inefficient allocation of resources and funding

According to DataDrivenVC.io "The VC investment process is broken. It's manual, inefficient, non-inclusive and biased"

Solution



Open platform directory for startups to securely list their pitch data, intellectual property & financials



AI generated investor to startup matching algorithm & tools

DAO Community-driven investment decisions

Decentralised venture capital model

Transparent, efficient, and inclusive funding process

How We Will Solve The Problem

We connect curated projects with funding and innovation networks through our online platform

Where We Work

Industry verticals that we care about

Verticals

Food Systems

Empowering food ecosystems in all levels of the supply chain, startups and incubators, and distribution services.

Circular Economies

Helping investors better connect the dots between these drivers of change, anticipate the most rewarding opportunities and gain a strategic advantage.

Health Systems

Supporting solutions that simplify doctors' work, connect patients with physicians, and allow them to live longer & healthier lives.

Renewable Energy

Backing projects that understand and build the capacity to navigate rising energy demands alongside the sustainability imperative.

Zero Carbon

We aim to showcase the exciting possibilities and key solution drivers set to usher in this transition period in the Net Zero space.

Exponential Tech

Matching funders with technologies that double in capability and performance over a short period representing innovative ways to operate.

"As an industry there needs to be more focus on equal opportunity for female founders" - Nick Allison (Founder Metatron)

Manage Deal Flow

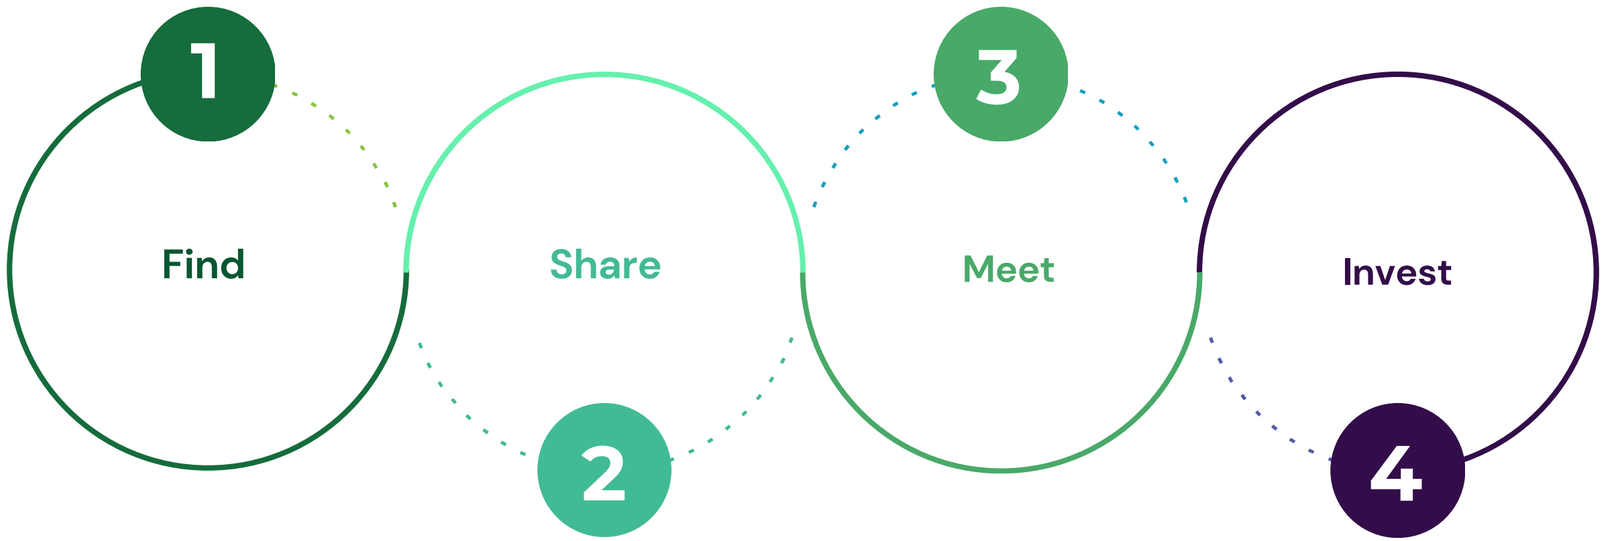
Business Model

metatron

Startup/Connector Business Model

We charge up to $15/month platform access including tools & features

Metatron Sales Pipeline Process



Investors

Startups market their pitch data to investors on the platform using the Metatron investor CRM.

Data

Once connected with an investor the investor can request access to the startup virtual data room data with read only access.

Online

Both parties can then meet online or in person for a pitch session. Investors invest in people and not companies.

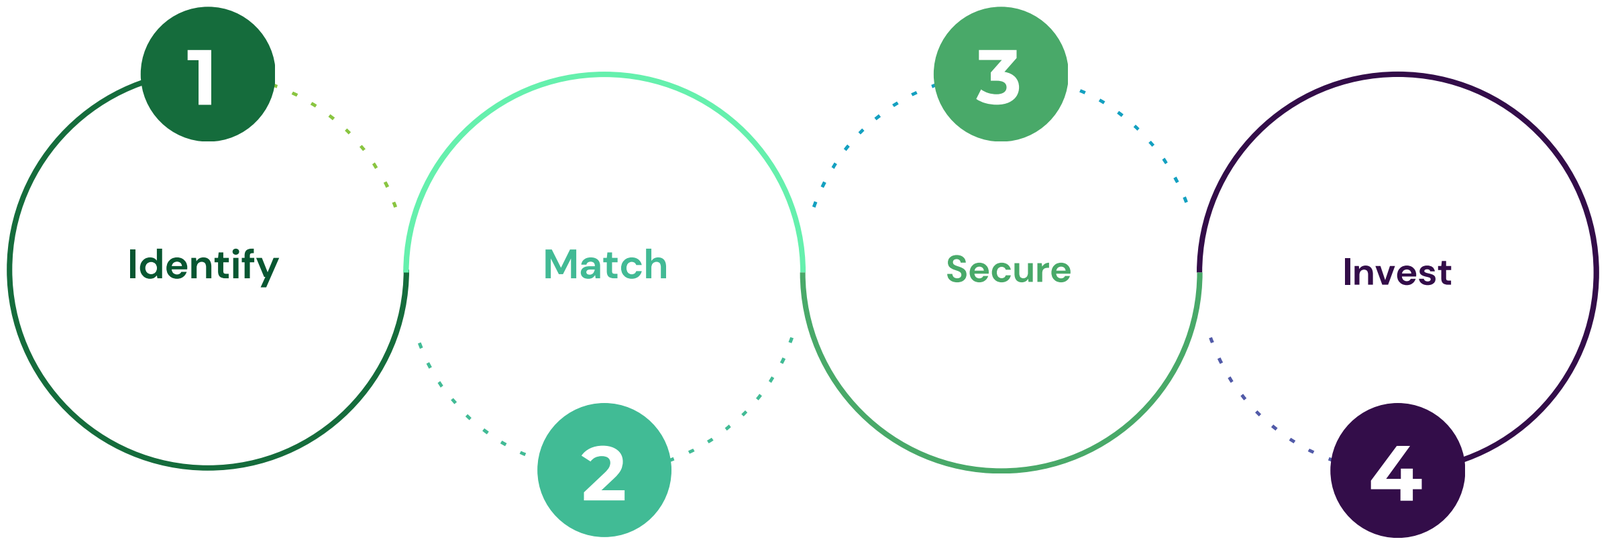
Securely

Once a deal is reached funds are deployed securely either on-chain or via FIAT, providing transparency for all parties concerned.

Investor Business Model

We take up to 5% commission for each deal on our launchpad

Metatron Protocol & Data Directory



Startups

Identify global startups requiring funding. Qualify, rate and curate them based on project data and market investment data.

Data

Match the startups with connectors and investors seeking investment opportunities based on their investment thesis.

Investment

Startup data is secured on the blockchain. Startups are then tokenised as "Real World Assets" using the ERC-3643 token stanard.

Securely

Once a deal is reached funds are deployed securely either on-chain or via FIAT, providing transparency for all parties concerned.

Founders & Advisors

Nick Allison
Co-Founder/CEO

Founder of Phoenix Eleven Capital in Hong Kong. PEC was focused on pre-seed and seed investment in projects in the exponential technology space and is the first iteration of what metatron DAO has become.

Nick has a sales, management, technology, blockchain and web2 applications background. He has a strong desire to bring impactful change to communities in all regions by sharing knowledge with entrepreneurs on the ground.

Hannah Ebbinghaus
Full Stack Developer

Hannah Ebbinghaus holds a Bachelor's degree in Biochemical Engineering. She interned at the Berlin Center for Genomics in Biodiversity Research and completed Bioinformatics courses at the Free University of Berlin. Transitioning into the tech industry, she co-developed blockchain-based loyalty and financial products at a startup, collaborating with companies like Kimberly-Clark and Campari. Her expertise spans smart contract development, blockchain integration, and full-stack development, with a proven ability to bridge technical innovation with customer-centric product design.

Nick Creed
Co-founder/CTO

Post-graduation, Nick taught AI, blockchain, and Python at Monash University, managing a class of 20 students while working on DAO initiatives.

He co-founded MetaGameHub DAO, developing machine learning tools to value NFTs in digital real estates like Sandbox. Later, he co-founded ForkedIP DAO under the RMIT University Blockchain Innovation Hub, focusing on tokenising intellectual property for research funding, which led to acceptance into an accelerator program with CSIRO, Australia's national science agency. Currently, as a co-founder of Metatron DAO, he is expanding his network and exploring the blockchain tokenised RWA (Real-World Assets) space.

Victor Obozia
Head of African Markets

Victor has over 16 years of experience in human resources, international relations, finance, and administration working with diverse organizations, from small startups to Fortune 500 companies. Having worked for Westwood Investment Consultancy Services, a Lagos-based firm focused on Africa offering services like deal origination, project incubation, investment strategy, and market analysis.

Laurence De Lumens
Global Markets/PR

Laurence has a strong background in sales, finance and people networking. An ambitious networker, with a diverse portfolio of connections, leveraging her knowledge of banking and financial systems to create the most impactful, cost-efficient outcomes.

She is an avid environmentalist and has been heavily involved in the rapid advancement of sustainable animal welfare systems in the Philippines.

Louis Grobelaar
FEOFIN Founder
Financial Partner
/Broker

Co-founder of Feofin Get Funding Ready in Luxembourg. Feofin Get Funding is a closed loop value driven platform for financial services in emerging markets.

A born networker, Louis has 18 years experience in the financial services industry. His strength lies in building relationships with people to create great outcomes for all involved. Innovative with explosive positivity and energy!
